Please add the following new claims:

--36. A data recording device for preserving data,
comprising:

a sensor configured to detect an occurrence;
a memory configured to store at least one of audio and
video data such that later stored data is recorded over
previously stored data;
a non-volatile memory; and
a controller configured to transfer the data stored in
the memory to the non-volatile memory based on the detection of
the occurrence by the sensor.

37. The data recording device of claim 36, wherein the
controller is further configured to transfer the data stored in
the memory which corresponds to a period of time beginning prior
to the detection of the occurrence by the sensor and ending
subsequent to the detection of the occurrence by the sensor.

38. The data recording device of claim 36, wherein:
the occurrence is a first occurrence;
the sensor is further configured to detect a second
occurrence; and
the controller is further configured to transfer the
data stored in the memory which corresponds to a first

period of time beginning prior to the detection of the first occurrence by the sensor and ending subsequent to the detection of the first occurrence by the sensor, and to transfer the data stored in the memory which corresponds to a second period of time beginning prior to the detection of the second occurrence by the sensor and ending subsequent to the detection of the second occurrence by the sensor to the non-volatile memory based on the detection of the second occurrence by the sensor.

all amended 39. The data recording device of claim 36, further comprising:

a portable housing having the sensor, the memory, the non-volatile memory, and the controller disposed therein.

40. The data recording device of claim 36, further comprising:

a weapon;

wherein the occurrence is the firing of the weapon.--
